

TESTING TIPS FOR MAP GROWTH

Student Directions Script

**To all students,
say:**

Give your best effort on this test. It is a chance to show how much you know. Your teacher can use the test to help determine the areas they can help you with the most. This is not a timed test, so it's important to take your time to understand each question before answering. Some questions will be easy, and others will be more difficult. It's okay not to know all of the answers. If you are not sure how to answer a question, then ask yourself which answers are definitely wrong, and choose from the other answers. Read every question and try your best.

Before you finish a question, you may change your mind and pick a different answer. But, once you move to the next question, your answer is locked, and you cannot go back to the question you have already answered.

I'm here to help if there is a problem with the test. If something is missing or if the test tells you to slow down, then raise your hand.

**If testing grade 2+
math, say:**

On some (but not all) test questions, a calculator tool appears at the top. You can click the calculator picture to open an on-screen calculator that helps you answer the question.

If you are not sure about a word in a question, raise your hand for help. I can pronounce the word for you, but I cannot tell you what the word means or explain any math symbols.

**If testing grade 2+
reading or
language usage,
say:**

If a reading passage is too long to fit on the screen, use the scroll bar on the right side of the passage to scroll down and display the rest of the passage and questions about it.

Sometimes a passage appears again and again, but look carefully, because you will see different questions for the same passage.

Student Sign-In Tips

For standard sign-in instructions, see the [Proctor Quick Start](#).

Student missing from Sign In —or— Student can't re-join	The student's status must be Awaiting Student in order to appear. On your Proctor console , select an action depending on the Status : <ul style="list-style-type: none">Confirmed: Choose Select Action > Do Not Confirm (you will confirm again later)Testing: Choose Select Action > Suspend<ul style="list-style-type: none">Once suspended, choose Select Action > Test AgainSuspended: Choose Select Action > Test Again Ask the student to log in again, and then confirm as usual.
Wrong test assigned—how do I switch tests?	<ol style="list-style-type: none">1. Select the student and click Select Action.2. If the status is <i>To Be Confirmed</i>, choose Do Not Confirm. —or—3. If the status is <i>Testing</i>, choose either Suspend or Terminate: Use Suspend if the student <i>might</i> need to take the test later this term. Use Terminate if you know the student will not need the test later this term. Caution: Terminate removes all responses and potentially blocks students from joining that test for the rest of the term.4. Click Select Action > Test Again.5. When the status changes to <i>Awaiting Student</i>, assign the correct test.6. Have the student sign in again.
If screen resolution is incorrect	The minimum required screen resolution is 1024x728, with the browser set to full screen and no zoom. Change the device display settings and, if needed, the browser display.
If “Students are Ineligible to Test” appears	Because of district settings, you cannot test the students (usually because the test was restricted to Once Per Term). Consult your school leaders, who can make any needed adjustments to test restrictions.
If “Action Needed to Continue” appears	The options you have include: <ul style="list-style-type: none">Resume Test: Continues a suspended test.Start Test Over: Starts the test over from the first question and terminates the original test, discarding any answers given. Use caution because it could also block the student from testing if the test has the Once Per Term restriction.Do Not Confirm: Terminates the original test and restricts the student from taking the test again this term.Cancel: Will close this prompt and you still cannot confirm the student for testing.

Test Question Issues

Testing is slow	On the student testing device, select Reset . On desktops, you can also use the keyboard command: F5 (Win) or Command+R (Mac)	 Reset	Dan (Gr 3) S
Question appears blank (white screen) —or— “Please raise your hand” appears	<ol style="list-style-type: none">1. On your Proctor console, with a student selected, choose Select Action > Suspend.2. On the student testing device, close the testing browser. PC or Mac: Select the X at top iPad: Use the Home button Chromebook: Select the X or Shift+Alt+K3. On your Proctor console, select the student again and choose Select Action > Test Again.4. On the student testing device, restart the testing browser and join the test again. The test continues where the student left it.		
Need to skip a broken question	<ol style="list-style-type: none">1. On the Proctor console, with the student selected, choose Select Action > Pause.2. Select the student again and then choose Select Action > Resume.3. After the student chooses Resume, a new question appears.		
Report a broken question	<ol style="list-style-type: none">1. On your Proctor console, obtain the Proctor PIN (upper right).2. On the student testing device, select: Ctrl+Shift+P (or Ctrl+Shift+L).3. In the window that appears, enter the PIN code.4. Describe the problem you're having with the test question. Note: You do not need to include the test name or question number.5. Select Resume Test. The MAP system sends the report to NWEA to be addressed (a “problem item report”), and the test resumes with the next question.		

Test Engagement and Rapid Guessing

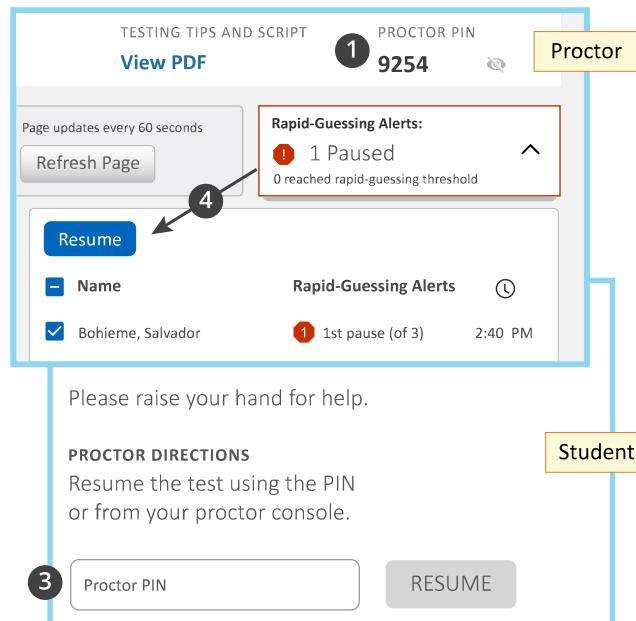

This feature applies to most MAP Growth and Screening tests, but not to Skills Checklist tests.

Proctor role in test engagement	<p>By helping students stay engaged with their test, you help ensure the assessment will better represent the areas you can help with the most. Before testing, clarify with students the purpose of MAP Growth and the importance of taking time on every test question. During testing, check the rapid-guessing alerts on the Proctor console.</p> <p>A <i>rapid guess</i> means the student answered well below the average response time measured by NWEA for each test question. The response is so fast that the student could not have viewed the question completely.</p> <p>Rapid guessing is <i>not</i> connected to total test duration. A student can finish quickly but still answer within the average time per question, and so <i>not</i> trigger the rapid-guessing alert.</p>
--	--

First pause—what to do

When a student rapid-guesses multiple times, the test automatically pauses, and an alert soon appears on the Proctor console. The best way to help students reengage will vary for each student:

1. For convenience, obtain or memorize the Proctor PIN for this testing session.
2. Approach quietly and encourage the student to take the time to think of the best answer for every question.
Avoid helping the student answer the test questions.
3. When the student is ready, enter the PIN on the student's testing device—the test resumes with the next question.
4. Or, for multiple students, use controls on your console (select the alert box, select names, and choose **Resume**).

Repeated alerts—what to do

If a student continues to rapid-guess multiple times, the test will pause again. Short tests like Screening have a total of 2 pauses and longer tests like MAP Growth have a total of 3 pauses, with the final pause at the rapid-guessing threshold (30% of questions possible on the test). Follow these best practices:

- As soon as possible, decide whether to continue the student's test another day, when the student is able to reengage. If so, then **Suspend** the test.
- Before ending the testing session, select **Download Session Progress** to keep track of the student's rapid guesses:
- For excessive rapid guessing, discuss with school leaders whether to start the test over (a retest).
- When you continue testing or if you retest, select **Find Students to Test**, open the **Test History Search** tab, and use the applicable search filters:

The screenshot shows the 'Test History Search' tab selected in the top navigation bar. Below it, the 'Find Your Students' section is active. A note states: 'Note: Students who have just tested may not yet be available in search results.' There are three main filter categories:

- If test was terminated**: This section includes a dropdown for 'Test(s) Required' set to 'Growth: Language 2-12'. It also has a 'Testing Status' section with checkboxes for 'Not yet tested' and 'Suspended Test'.
- If test was suspended**: This section includes a 'Test Engagement' checkbox for 'Reached rapid-guessing threshold (30%)'.
- If test was completed**: This section includes a 'Tests Taken' section with radio buttons for 'Current Term' (selected), 'Inside Test Window', and 'Outside Test Window'.

- If a student reached the rapid-guessing threshold and if your leaders agreed to retest, then choose **Start Test Over** at the confirmation prompt. Otherwise, choose **Resume**.

Note: Do not expect to see last question number or rapid-guessing count listed with the student.

Continuing Suspended Tests

Note: Students should continue tests within 14 days, although the maximum is 28 days.

Continue same day, same session

1. With the testing session still open, select the students with Suspended status.
2. Choose **Select Action** and select **Test Again**.

Continue another day, same session

If you know most of the same students in your testing session will return, you could save the session and reopen it later. Under Manage Testing Sessions, select the session you saved and then **Test Now**.

The Status for everyone will be Awaiting Student, meaning they can now sign in to the session. The session password will be new while the session name will remain the same. When prompted, select **Resume Test** and then **Submit**.

Continue another day, new make-up session

In a new make-up session, you can include a mix of students, those who need to finish testing and those who have not yet tested.

1. Under **Manage Test Sessions**, select **Find Students to Test**.
2. Open the **Test History Search** tab.
3. Select School, Test, and other search filters.
4. Choose **Search** and then, from the pop-up list, choose **Add Students**. To help find students, you can sort by the **Test Event Start Date** column.
5. **Important:** Select students and choose **Assign Test** and, if needed, **Assign Accommodations**.
6. Select **Test Now**.
- Note:** The status will change to Awaiting Student for everyone, meaning they can now sign into the session. The question numbers will also be blank.
7. While confirming students, choose **Resume Test** when prompted.
